As soon as you will open the game The home screen will come which will last for around three seconds which then gives you two options to either load a saved game or begin with a new game on choosing the appropriate option you will be directed towards the choose level screen that is the screen where the user will be allowed to choose the level on which he or she wants to play on choosing the level the user will be directed towards the actual game screen.

On the game screen the user can either click escape or click on the pause button in the top right corner of the screen to pause the game at any stage in the game the user can click the back button on the top left corner of the screen to go to the previous screen.

On the choose level screen the user can click one on the keyboard to choose the level 1.

On the actual game screen the user can click W on the keyboard to see the screen which he or she will see when he or she will win the game. Similarly, L can be clicked on the keyboard on the actual game screen to be redirected towards the screen which the user will see when he or she will lose the game.
